

STREET MARKETS THE WORLD OVER

Compiled by Bushra Sarwar with Arif Hasan

The pictures contained in this folder have been put together to show to the persons and agencies involved in taking decisions on urban planning issues on Karachi that hawkers need not be evicted as they can be resettled in a manner that is aesthetic and that does not create congestion and hindrance to vehicular traffic or pedestrian movement.

The markets shown in the attached pages are those that have been setup by local governments. In some cases space has been leased to individual hawkers; in others they have been granted a yearly renewable license; and in yet others hawkers cooperatives have been given the responsibility to operate and manage these markets. In all cases the markets generate considerable revenue for local governments.

Markets in Karachi pay corors of rupees per day to the representatives of government agencies who are provided police support in extracting bhatta from the so called encroachers.

Let us not simply destroy but build new multiclass spaces for a more equitable Karachi.
